

# Got questions?

## **What exactly is Jeuveau®?**

You know those pesky little wrinkles between your eyebrows that won't go away? Well, they're called glabellar lines, or "frown lines."<sup>1</sup> Jeuveau® is an injectable treatment that works to temporarily improve the appearance of moderate to severe frown lines in adults.<sup>1</sup>

## **How does Jeuveau® work?**

Jeuveau® prevents your nerves from telling your facial muscles to flex.<sup>1</sup> The result? In clinical trials, Jeuveau® was shown to temporarily improve the appearance of moderate to severe frown lines.<sup>1</sup> In 2 long-term safety studies, patients received an average of 3 treatments over the course of 1 year.<sup>1</sup>

## **What are the results with Jeuveau®?**

In our 2 major clinical trials, when we checked at the 30-day mark, 67.5% of patients in 1 study and 70.4% of subjects in a second study were responders defined as a 2-point composite improvement agreed upon by physician and patient.<sup>1</sup>

## **What's it like before and after treatment?**

If it's your first time getting a treatment, you may be a little nervous. And that's okay! Localized pain, infection, inflammation, tenderness, swelling, erythema, and/or bleeding/bruising may be associated with the injection.<sup>1</sup>

For specific instructions on what to do before and after your injection, please follow the instructions as given to you by your doctor or healthcare provider.

## **What are the side effects?**

The most commonly reported side effects in clinical trials include headache, eyelid drooping, upper respiratory tract infection and increased white blood cell count.<sup>1</sup> No serious drug-related adverse events were observed in the studies.<sup>3-7</sup>
